

**Collect 100 flowers for Busy Bee - a counting game** involves children in taking turns, rolling a dice, making tallies, counting to 100, and adding or counting tallies.

The original game is provided in two printable formats: one for individual play or competitively against others, and one for cooperative play with a partner.

The game is ideal as a maths group activity and can be used at any time to reinforce understanding of numbers to 100.

Responsive and targeted questioning can be used to aid and assess understanding for example:

- What number are you up to?
- How many times have you rolled the dice?
- What number will you land on if you throw a 5?
- What number do you need to roll to land on 80?
- What is the least number of times you could roll to reach 100?
- What is the greatest number of times you would have to roll before you reach 100?
- Could reach 100 on your next roll? Why or why not?

## Collect 100 flowers for Busy Bee

Play this game on your own or in groups.

**You need:**

1 dice

Coloured pencils

1 copy of this game sheet each

**How to play:**

Take turns to roll the dice.

On each roll, starting at number 1, colour the same number of flowers as the number rolled on the dice. Do a tally mark for each roll.

Continue to colour the flowers on each turn until you reach 100.

Count the number of times you rolled the dice to reach 100!

My tallies

I rolled \_\_\_\_\_ times!
